

Streetblaster 150i & 150Ti

Single Point Nitrous System for Fuel Injected Cars

The Street-Blaster 150i is a single point injection system for various engine configurations with a single throttle body or common airbox, and benefits from **numerous unique features as standard** equipment, which offer **substantial advantages** over all other brands. All the hardware you need for a safe and effective nitrous system is included in this kit, either for self-fit or installation at our premises. *Carburettor version also available.*

Features:

- Crossfire injector which gives outstanding fuel atomisation and even fuel/nitrous distribution.
- Latest specification market-leading X10 billet alloy solenoids, safe and totally reliable.
- Micro bore nylon hose for maximum efficiency and minimal nitrous consumption.
- EU specification nitrous bottle with FlowMax valve & unique safety pressure relief valve.
- Laserlite QD nitrous bottle mounting system.
- Lifetime guarantee.

POWERHOUSE, Unit 7, Carr Wood Ind Estate Phase 1, Sheepbridge, Chesterfield, S41 9QB

If you want a **simple to fit, well priced system that delivers maximum reliability and power**; the Street-Blaster 150i has been developed by WON with you in mind. This system is **for street and race use**, whether it be purely for the thrill or the more serious use of gaining a competitive edge. The Street-Blaster 150i can deliver a boost of up to 150bhp (or more if specified at point of order), **whenever you need a burst of acceleration**. Utilising the same high-quality components as our ultimate race, Pro-Series systems the Street-Blaster 150i offers peace of mind and impressive results at a very competitive price.

Parts Included:

- 1 x [Crossfire](#) Injector (spacer & retainer).
 - 1pr x [Billet alloy Pulsoids](#) with CNC machined SS fittings and laser cut mounting plates.
